Livermore, California 94550

Dear Dr. Robison:

This is to advise you of the need to retain and archive the gamma spectrometry records that have been generated in execution of the Department's environmental monitoring activities in the Marshall Islands. These records should be kept in storage for an indefinite period of time. Please do not dispose of them. These records constitute a valuable resource that may be needed to address Congressional, public, scientific, and Republic of the Marshall Islands inquiries in the future.

Sincerely,

R.T. Bell

R. Thomas Bell
